

CWA Engineers is an industry leading consulting engineering firm which provides professional services to clients in Canada, the US, and Internationally.

Our multidisciplinary team specializes in a diverse range of industries including: Ports and Marine Terminals; Mining and Minerals; Construction Materials; Bulk Materials Handling; Wood Products, Pulp and Paper; Oil and Gas; Utilities and Municipal Infrastructures.

Due to our expanding client base and growing project needs. CWA is seeking a qualified candidate to join our team in the following capacity:

Senior Electrical Designer

The Ideal Candidate will possess the following qualifications:

- A minimum of 7 to 10 years of relevant design experience in power generation, substation, power distribution and control systems design, and PLC programming.
- Excellent communication and interpersonal skills.
- Experienced working with AutoCAD.
- Experience working on power flow analysis, short circuit, device coordination, and arc flash analysis will be an asset.
- Demonstrated ability to coordinate a design group and to provide technical support and mentoring for junior staff.

This is an ideal opportunity for a professional who is seeking to take his or her career to the next level by taking on new challenges within a fast pace and growth oriented environment.

If you have the required qualifications and an ambition to succeed, then we would like to meet you and further discuss the possibilities.
