

CWA Engineers is an industry leading consulting engineering firm which provides professional services to clients in Canada, the US, and Internationally.

Our multidisciplinary team specializes in a diverse range of industries including: Ports and Marine Terminals; Mining and Minerals; Construction Materials; Bulk Materials Handling; Wood Products, Pulp and Paper; Oil and Gas; Utilities and Municipal Infrastructures.

Due to our expanding client base and growing project needs. CWA is seeking a qualified candidate to join our team in the following capacity:

### **Senior Materials Handling Engineer**

The Ideal Candidate will possess the following qualifications

- A Bachelors Degree in Mechanical Engineering and eligibility for Professional Registration with APEGBC
- A minimum of 10 to 15 years of relevant design experience including conveying systems, bulk loading and unloading equipment, piping systems, dust control systems and mine process equipment.
- Excellent communication and interpersonal skills
- Demonstrated ability to manage and lead a design group and to provide technical support and mentoring for junior staff

This is an ideal opportunity for an engineering professional who is seeking to take his or her career to the next level by taking on new challenges within a fast pace and growth oriented environment.

The successful individual with demonstrated technical skills and management capability will be seriously considered for advancement to management positions.

If you have the required qualifications and an ambition to succeed, then we would like to meet you and further discuss the possibilities.
